PROFILE SUMMARY

Analytically driven professional with 4+ years of continuous experience at Cognizant Technology Solutions and a Master's degree in Statistics (9.00 CGPA). Proficient in SQL (SQL Server, MySQL), Python (Pandas, NumPy, Matplotlib), Power BI (DAX, KPIs, dashboards), Excel, and R, with a strong foundation in statistical analysis, data cleaning, validation, and visualization. Experienced in stakeholder communication, process automation, and data governance through client-facing operational roles. Seeking a Data Analyst, BI Analyst, or Reporting Analyst role.

SKILLS

Programming & Statistics: Python (Pandas, NumPy, Matplotlib), R, SQL (SQL Server, MySQL), Statistical Analysis

BI & Visualization: Power BI (DAX, KPIs, Dashboards, Drill-throughs, Slicers), Excel

Data Analysis: Data Cleaning, Data Validation, Data Quality, ETL, Exploratory Data Analysis

Cloud & Monitoring: Azure Data Factory, Azure Data Lake, Azure Blueprint, Dynatrace (P1/Normal Alerts), Website Monitoring, DLQ Management, Azure Activity Logs

Enterprise Systems & ITSM: SAP, Mainframe, i90 Applications, ServiceNow (Incident Handling, Access Provisioning)

Governance & Version Control: Internal Financial Controls (IFC), Data Recertification, GitHub

EXPERIENCE

Cognizant Technology Solutions

Junior Software Engineer

Oct-24 to Present | Gurugram, HR

- Monitor Azure Data Factory pipelines, Azure Blueprint deployments, and Dynatrace (P1/Normal) alerts, and perform Dead Letter Queue (DLQ) activities to triage and resolve failed data jobs, supporting pipeline reliability and data quality.

Senior Systems Engineer

Jul-23 to Oct-24 | Remote

- Analyzed and presented team performance metrics and operational data in client meetings; recognized by leadership for strong stakeholder communication and time-management skills.

System Engineer

Mar-23 to Jul-23 | Remote

- Automated quote generation processes using Ireland VDI, monitored to ensure application uptime and availability, and executed Internal Financial Controls (IFC) checks and large-scale user/manager data recertification, supporting data governance and compliance.

Programmer Trainee

Jul-22 to Mar-23 | Remote

- Performed health checks across multiple websites and applications, and monitored/validated job execution across SAP, Mainframe, and i90 applications, ensuring uptime and accurate data processing.

PROJECTS

Retail Analytics Dashboard

[view](#)

- Built an end-to-end retail analytics solution using Python for ETL, MySQL for storage, and Power BI/Excel for visualization; designed dashboards analyzing sales, customer, product, and payment performance.

SQL Projects

[view](#)

- Performed advanced SQL analysis on real-world datasets (Domino's Pizza Sales, Netflix Movies & TV Shows) using joins, CTEs, window functions, and time-based/revenue analysis.

Power BI Projects

[view](#)

- Designed interactive dashboards (COVID-19 Global Impact, Global Retail Sales Insights, Mobile Sales Performance) using DAX, KPIs, drill-throughs, and slicers.

Python Data Analytics

[view](#)

- Developed Python analyses on Internet Speed and Data Quality Validation using Pandas, NumPy, and Matplotlib, performing data cleaning, validation, and exploratory analysis on CSV datasets.

EDUCATION

M.Sc (Statistics) | Aligarh Muslim University, Aligarh

9.00 CGPA | 2020-2022

B.Sc (Statistics) | Aligarh Muslim University, Aligarh

9.00 CGPA | 2017-2020

CERTIFICATIONS

SQL Bootcamp — Udemy

Microsoft Power BI Essentials — Udemy
